Electronical technical journal of technology, engineering and logistic in transport

Number: 4 Volume: IV Date of edition: December 2009

ISSN 1801-674X

Dear readers, contributors and reviewers,

the end of December brings the third issue of the fourth year of our electronic journal of technology, engineering and logistics services. This concludes another year of its operation, which can be considered as very successful. Again we can be proud of being listed in the List of reviewed non impact journals published in the Czech Republic. We intend to keep it this way also during the upcoming period. Our effort to publish other issues of the magazine is aimed to improving published articles, to publishing new pieces of knowledge and new solutions to current problems in the field of technology, engineering and logistic services in connection with its inseparable economical field. We will continue in publishing particular issues, not only in Czech, but also the special issue completely in a foreign language, preferably in English.

Therefore, I would like to, almost at the end of the year 2009, thank to all the contributors for very valuable contributions, then to all the reviewers for their cooperation in drawing up reports and also to all the readers for their goodwill.

Hana Císařová
editor
